

PRE- PT COURSE SEQUENCE

The following course sequence is recommended; however, there is some limited flexibility within the schedule.

The following sequence of courses serves as a **suggestion** only and variances may occur. Many PT schools may have different prerequisites; therefore, you should see the health professions advisor. In addition, you should check required courses for PT schools to which you plan to apply.

FRESHMAN	SOPHOMORE	JUNIOR	SENIOR
FALL	FALL	FALL	FALL
BIO 105 – General Biology I and Lab (or Sophomore year) PSY 100 – Intro to Psychology IDS 100 – FYS KIN 140 or 3 credit course 3 credit course	CHEM 125/127 General Chemistry I & Lab OR CHEM 131/132 – Accelerated General Chemistry & Lab BIOL 221/221L – Human Physiology and Lab MATH 130/131 – Foundations of Calculus, Calculus (prerequisite for Physics) 3 credit course	PHYS 105/107 – College Physics I and Lab PSY 230/230F – Developmental Psych and Field Placement	
SPRING	SPRING	SPRING	SPRING
BIO 106/108 – General Biology II and Lab (or Sophomore year) KIN 200/200L – Human Anatomy and Lab ENGL 113 – Expository Writing KIN 140 or 3 credit course	CHEM 126/128 – General Chemistry II & Lab KIN 321/321L – Exercise Physiology and Lab MATH 115 – Intro to Statistics OR MATH 219 Statistical Methods 3 credit course 3 credit course	PHYS 106/108 – College Physics II and Lab GRE Exam <i>Application to Physical Therapy School for the following year. Opens mid June.</i>	

This is only used to demonstrate the timeline of courses prior to application. Everyone may have a similar or different route to completion of prerequisites and application cycle.

All prerequisite courses typically require a C grade or better. Prerequisites may vary from schools and they may or may not accept AP or community college courses. Please check to make sure you have met the prerequisites and competencies for the medical school in which you intend to apply.

Although any major can be applied, many Pre-PT students are Exercise Science majors. A four year plan for those with this major can be found on Hope's Website. https://hope.edu/academics/kinesiology/resources/PRE-PT-COURSE-SEQUENCE_Fall-2023.pdf

Other important facts regarding PT school admissions

Physical Therapists receive a doctoral degree through three-year DPT programs. Applicants use PTCAS <https://ptcas.liaisoncas.com/applicant-ux/#/login>

American Physical Therapy Association has additional helpful information <https://ptcasdirectory.apta.org/>

The courses listed below are offered at Hope and will prepare you for the **GRE (Graduate Records Examination)**. Most graduate schools require this exam, but not all of them do. The GRE covers: verbal reasoning, quantitative reasoning, and analytical writing. Applicants traditionally take the GRE the spring before applying to graduate school.

- A score will be calculated for each section, ranging from 130-170 for both the verbal and quantitative reasoning sections, and 0-6 for the analytical writing section.
- The national GRE averages for those applying to occupational therapy school fluctuate minimally from year to year. Recently reported means are: VR = 149, QR = 149, AW = 3.8
- Some schools will superscore the GRE (take the highest score of each section out of all of your attempts). Look at individual schools you plan on applying to for that information as well as their individual data on average scores of accepted students.

For PT admission, they often calculate a separate prerequisite GPA in addition to your overall cumulative GPA.

More information about the GRE can be found on their website.

[Learn About GRE](#)

A student can choose any major at Hope as long as the prerequisites for PT school are fulfilled.

Physical Therapy Schools complete a holistic review of your application and these are the areas that demonstrate your readiness to enter the profession. Keeping a journal of these experiences will help you with accurate accounts and reflections that assist you with your personal statement.

- PT related Clinical Volunteer/Work Experiences (shadowing, volunteering or working in a variety of physical therapy settings).
- Community Service
- Strong Letters of recommendation (typically students get two to three letters of recommendation which include at least one from a licensed PT and one or more from a professor)

Core Competencies that PT schools are looking for in an applicant can be found at:
